

INTERVENTION
 Writing Numerals

Each Intervention Anchor Chart contains steps to allow the child to investigate independently.

Children investigating an Intervention may be provided with the Intervention Anchor Chart as a guide to follow as they investigate independently.

Children investigating an Intervention may have their progress recorded in the Progress Sheet.

Progress Sheet [page 4](#)

Writing Numerals (Early Counting and Grouping 2)

RESOURCES:
number cards, marker,
whiteboard

As an Intervention, for example, for children who are not yet able to count, recognise and write teen numbers, and children whose understanding of the counting concepts is not at grade Level (for example, children with a learning difficulty or a child new to English, **this could be implemented while the rest of the children are investigating differentiated Levels of the class concept or a related concept.**

RECOGNISE NUMERALS

Implementation: Daily in maths investigation time

TEACHER INSTRUCTIONS – for CHILD INSTRUCTIONS, see next page

Write numerals (for example, to at least 10, then 20, or for older children / new arrivals to at least 110, then 1110 - focusing on bridging place values, etc)

- a. First identify what numerals the child is able to write accurately, independently and consistently.
- b. Record the lowest numerals that the child cannot yet write on card in **red**. If the child writes 1, 4, and 6, but not 2, 3, and 5, give the child the numeral 2 initially.
- c. Place the numeral printed in **red** on card into a small snap lock bag.
- d. When other children are investigating the class concept, give the child the bag with their numeral range.
- e. They place the numeral in the correct orientation. They read the numeral.
- f. On a whiteboard, the record the numeral using a whiteboard marker.
- g. Observe their first attempt. If it is incorrect, have them stand in front of you as you guide their hand to write the numeral gigantically in the air, then have them write it on their board with their finger, then with the whiteboard marker.
- h. They erase the numeral, write it again, erase, write, for a few minutes.
- i. As the child demonstrates their capacity to write numerals, add 1 more numeral to their range.
- j. Continue to increase the child's range as they demonstrate their capacity to write numerals, until the child reaches 20.
- k. After a couple of times, the child will learn that when they are given their **red** numbers, this is their investigation.

Write Numerals

Select a number.

Say the number.

Trace the number with your finger.

Write the number in the air.

Write the number with your finger on a whiteboard.

Write the number on the whiteboard with your marker.

Erase the number and write it again.

Progress Sheet

Child's Details (Name and Intervention Concept):

Each day, record the child's progress. This record, along with the child's recordings and explanations, can be used as: **ASSESSMENT OF LEARNING (SUMMATIVE)** – at any point in time the child's demonstrated level of understanding may be recorded for tracking and reporting purposes.

ASSESSMENT FOR LEARNING (FORMATIVE) – the teacher may use the child's demonstrated levels of understanding over time to plan, implement and evaluate further teaching and learning. Recording daily will allow the teacher to identify irregular learning progress, where the child demonstrates understanding in one lesson but not in subsequent lessons. This record can accompany an IEP, and a referral for further support for the child.

ASSESSMENT AS LEARNING (FORMATIVE) – the child may be shown this record to allow them to identify their learning progress. The teacher will use their teacher professional judgment to decide whether this is appropriate.
