

INTERVENTION

Duration of Events - Calculation

Each Intervention Anchor Chart contains steps to allow the child to investigate independently.

Children investigating an Intervention may be provided with the Intervention Anchor Chart as a guide to follow as they investigate independently.

Children investigating an Intervention may have their progress recorded in the Progress Sheet.

Duration of Events - Calculation

(Time 16)

RESOURCES: pencil,
paper / Maths book

Record 2 times on analog clocks.

Record the times on digital clocks.

2:47 to 3:12

Calculate the time duration from the earlier time to the later time.

2:47 is 13 minutes until 3 o'clock.

3:12 is 12 minutes after 3 o'clock.

13 minutes + 12 minutes = 25 minutes

Time duration fro 2:47 to 3:12 is 25 minutes

Reflection: How can we calculate time duration?

Progress Sheet

Child's Details (Name and Intervention Concept):

Each day, record the child's progress. This record, along with the child's recordings and explanations, can be used as: **ASSESSMENT OF LEARNING (SUMMATIVE)** – at any point in time the child's demonstrated level of understanding may be recorded for tracking and reporting purposes.

ASSESSMENT FOR LEARNING (FORMATIVE) – the teacher may use the child's demonstrated levels of understanding over time to plan, implement and evaluate further teaching and learning. Recording daily will allow the teacher to identify irregular learning progress, where the child demonstrates understanding in one lesson but not in subsequent lessons. This record can accompany an IEP, and a referral for further support for the child.

ASSESSMENT AS LEARNING (FORMATIVE) – the child may be shown this record to allow them to identify their learning progress. The teacher will use their teacher professional judgment to decide whether this is appropriate.
